## Catalina 445

### Introducing the new Catalina 445

This all-new model incorporates crisp, contemporary styling with proportions and features that make Catalinas comfortable and secure underway and on the hook.

Based on a new hull design with a long waterline and moderate beam and freeboard, the 445 has excellent performance potential. The hull form is optimized to provide the gentle, predictable motion underway, which is appreciated in other Catalina models.

The deck is strikingly handsome with a low profile cabin structure, twin helm stations and a roomy cockpit with tall, secure coamings and a table that seats 4-6. The deck is finished with traditional diamond-patterned non-skid.

The accommodations are designed for live-aboard comfort. The owner's cabin is forward for privacy and optimum natural ventilation.

The guest cabin is aft, with a large comfortable double berth, angled for easy access and greater headroom.

The cabin to port is a flexible space, easily converted to whatever your cruising style dictates at the time – sleeping quarters, storage, or a work room with a bench. The galley has the storage and features needed for extended cruising.

The interior is constructed of teak and teak veneers, hand-finished with durable clear varnishes, highlighting the natural beauty of fine woods.

All systems are engineered for accessibility and reliability, following the recommendations and standards of ABYC and IMCI.
